## **StarDental<sup>®</sup> Introduces a New Electric Choice: The NuTorque<sup>®</sup> Lite Programmable Electric Handpiece System**

### ***StarDental's Growing NuTorque<sup>®</sup> Line Offers Affordable Electric Choices***

**Malvern, PA (February 22, 2010)** – DentalEZ<sup>®</sup> Group, a supplier of innovative products and services for dental health professionals worldwide, is pleased to announce that it has expanded its StarDental<sup>®</sup> line of electric handpiece systems with the recent introduction of the new NuTorque<sup>®</sup> Lite.

A modified version of the popular NuTorque<sup>®</sup> programmable electric handpiece system, the NuTorque Lite is the perfect economical option for the dental professional seeking a less-aggressive entry point into utilizing an electric handpiece system. It is an ideal choice for dental professionals to perform general dental practice procedures, as well as basic endodontic procedures.

Much like the original NuTorque programmable electric handpiece system, the NuTorque Lite is a highly intuitive system. Dental professionals will be able to control the system's features with easy-to-use push-button controls.

Benefits of the NuTorque Lite system include:

- 2 customizable memory presets for general and endo procedures
- Speed, Gear Ratio, and Forward/Reverse Direction settings
- Universal E-type motor coupling accepts seven different NuTorque attachments
- Adjustable light intensity
- Autoclavable, brushless motor

The NuTorque Lite system provides maximum flexibility for a variety of individual solutions. The display screen includes useful options, such as two fully customizable memory presets for commonly used gear ratios, RPMs, and direction.

The NuTorque Lite is also equipped with a brushless motor that is extremely compact and lighter than existing electric motors currently on the market. Measuring in at a mere 6 inches and weighing less than 76 grams, the balanced, lightweight micromotor of the NuTorque Lite enables the dental professional to maneuver comfortably and effectively throughout the oral region.

## News Release

With the NuTorque Lite system, dental professionals are provided the freedom to perform various individual procedures while delivering consistent speed and powerful torque on both high- and low-speed settings. The whisper-quiet, vibration-free motor system is also easily adaptable to existing standard delivery units. Moreover, NuTorque Lite's micromotor is fully autoclavable.

NuTorque Lite attachments feature lightweight, durable, and corrosion-resistant titanium housings that provide a firm, tactile grip. The lightweight attachments grant the handpiece exceptional balance and help reduce hand and wrist fatigue.

NuTorque Lite features an impressive seven attachment options, including the new Straight Doriot. The NuTorque attachments have a number of features and benefits, including:

- Push-button autochuck for easy bur placement/removal
- Quick, simple connections with 360-degree rotation
- A wide speed range of up to 200,000 rpm
- Ergonomic grips relieve user fatigue
- Cellular glass rod fiber optics (except new Straight Doriot)
- Universal E-type coupling
- All attachments are fully autoclavable

The slender angulation of NuTorque Lite attachments permits excellent intraoral access and superior sight lines.

StarDental's NuTorque Lite system has a three-year warranty on the control box unit, a one-year warranty on the motor, tubing, and attachments, and a one-year warranty on the transformer.

For more information on the NuTorque Lite electric handpiece system and a full listing of attachments, please call 866-DTE-INFO, or log onto [www.dentalez.com](http://www.dentalez.com).
